LINK® Portable Ramps

LWS40 & LS50 Series

Lightweight LWS40 Series

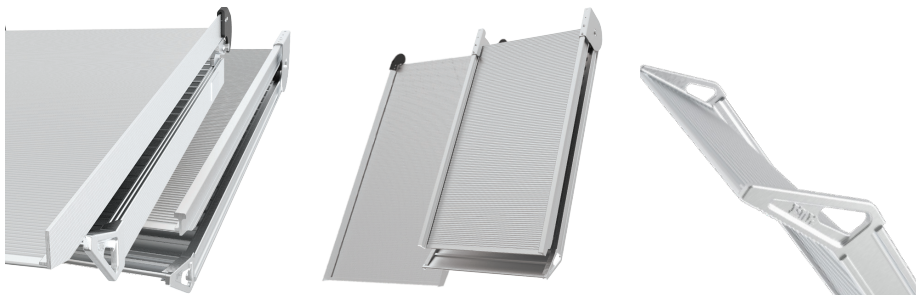

This lightweight ramp is ideal for loading and transporting lighter packages and equipment. The LWS40 has a 300-500 lb. capacity depending on the length or width of the ramp.

The ramp works perfectly for rear or side loading, and is 30% lighter than our LS50 Model. The LWS40 series is available as a straight welded design or a compact bifold option.

Heavy Duty LS50 Series

This heavy-duty aluminum ramp is portable and perfect for general use. The LS50 has a 750-1,000 lb. capacity depending on the length or width of the ramp.

The LS50 is quick to position, and allows you to reduce dangerous lifting and equipment damage. Built with high strength aluminum the LS50 series is available as a straight welded design or a compact bifold option.

HIGH STRENGTH ALUMINUM

Our ramps are designed for reliability and durability using extruded high strength steel and state of the art manufacturing processes.

BIFOLD PORTABLE RAMP OPTION

Both the LWS40 and LS50 are available with a compact bifold option which will allow you to store the ramp in length restricted areas.

PERFECT FOR LOADING & GENERAL USE

Link portable ramps are easy to position with a wide approach and firm side walls. They work great for medium duty vehicles for rear or side loading.

RAMP PART #	MODEL # (Style-W-L)	CAPACITY (Lbs)	WEIGHT (Lbs)
-------------	---------------------	----------------	--------------
