Reduces Whole Body Vibration for Drivers

Reduces longitudinal vibration above 0.15g by 76%

ROI CABMATE® Electronic Cab Suspension

- Provides optimized damping forces in real time
- Stabilizes vertical travel and lateral body roll
- Electronic height control manages air consumption
- Improved noise and vibration isolation
- Wide damping range reduces damaging heat cycles on shock absorbers

Reduces driver fatigue and drowsiness

Provides safer driving conditions with improved cab stability

Best-in-class driving experience for better driver retention

Controls the cab during wind shear or maneuvers

Decreases sleep disruption for team drivers

Reduces compressor run times and wear on components

Joel Morrow

"I would characterize the ROI Cabmate® as nothing less than the gold standard in cab suspensions. The ride not only feels highly controlled, but soft and smooth like nothing I've ever experienced."

Henry Albert

"Every aspect of the control and ride going down the road was improved. From the safety side you are less fatigued at the end of the day. If you're less fatigued, you have to be a safer driver."

TRUCK	MODEL	YEAR	PART #
Freightliner	Cascadia	2019 & Newer	26302010
International	LT Series	2017 & Newer	26302020
Kenworth	T680, T880, & W990	2012 & Newer	26302030
Peterbilt	567 & 579	2012 & Newer	26302030
Volvo	VNR, VNL, VHD, & VNX	2017 & Newer	26302040

Prevents Driver Injuries and Trailer Damage

Estimated savings over 200 tractors is \$150,000

SMARTVALVE® Electronic Chassis Height Control

- All in one integrated electronic height control system
- Includes 3 standard modes of operation: standard ride height, above ride height, and dump
- Controls ride height and air pressure to the suspension
- Automatically returns to ride height at low speeds from the dump or raised position

Increases driver safety and improves cranking conditions

Reduces driver fatigue, back pain, and shoulder injuries

Reduces damage to trailers and landing gear

Allows a driver to pull out trailers parked too close to access

Improves nose lift on a tanker trailer for better discharge

Offers additional ground clearance on low boy trailers

Alec Costerus
Volvo Driver

"The SmartValve is fantastic. Not only for leveling purposes but also for raising suspension during hookup to take pressure off landing gear. Saves a lot of time cranking landing gear."

Mack	Universal	Retrofit	H00700R6A	H00700R26A
Volvo	Universal	Retrofit	H00700R5A	H00700R25A

For over four decades, Link Manufacturing has served the commercial vehicle market. We pride ourselves on going the extra mile to meet our customers' expectations and assure their satisfaction. Our pledge is superior service and support; outstanding product quality; and consistent, on-time delivery.

Link designs and manufactures air suspension systems and components for commercial vehicles. Link specializes in manufacturing cab, chassis and auxiliary suspensions, height control valves, and specialty products.

Road Optimized Innovations products are designed, tested and built with state-of-the-art manufacturing processes to achieve the highest quality standards.
