Swivel Ramp

MODEL # (Style-W-L)	HEIGHT STORED (INCHES)	BASEPLATE DEPTH (INCHES)	BASEPLATE WIDTH (INCHES)
------------------------	------------------------------	--------------------------------	--------------------------------

LSR90 Swivel Ramp (Bi-Fold Design)

LSR90-30-99	58.75	9.75	49.5
LSR90-30-108	63	9.75	49.5
LSR90-30-117	67.75	9.75	49.5
LSR90-36-99	58.75	9.75	55.5
LSR90-36-108	63	9.75	55.5
LSR90-36-117	67.75	9.75	55.5
LSR90-47-99	58.75	9.75	66.5

In the stowed position, the wheel on the pivot side of the ramp will need approximately a 7.5-inch radius of clearance from the pivot center to operate properly. The widest ramp at 47 inches will need approximately a 55-inch radius of clearance to operate properly.

It is recommended that the ramp be positioned and moved through the full 180 degrees of motion to ensure proper clearance before drilling holes. This activity requires two people.

WARNING: Link products must be professionally installed by a trained technician when being placed into an Electric Vehicle (EV). Electric Vehicles have higher voltage batteries and cables and drilling into Electric Vehicles may cause serious bodily harm and possibly death. Link is not responsible for optional configurations or equipment that restrict the installation of this product in any way. Consult OEM body builder guides for additional installation guidelines.
