

driven to *outperform*

Link® | Canada

Based in Nisku (Edmonton) Alberta, Link® Canada is the branch of Link® that focuses on serving the unique needs of, and testing unique applications for, the heavy vocational and military markets. Link's research and development efforts in Nisku provide distinctive results for applications requiring 60,000lb – 90,000lb suspension capacities. The commitment to servicing the logging, oil-drilling and military customers has enabled Link to provide results where others were unsuccessful.

Link Canada has a long history of providing tailored solutions to the heavy vocational truck market. We are proud of our team of highly skilled technicians, welders, engineers, field salesmen, and support staff who are committed to building a business based on employee involvement, training and development within a safe and pleasant work environment. Our commitment is to engineer and develop quality products for our customers.

Our Employee Commitment

For those wondering what it is like to work at Link® Canada, we want you to know that we treat our employees as valued members of our team. Our employees truly care about each other. We treat each other with respect all while encouraging personal growth and celebrating employee success.

Link® Canada has developed a winning work environment that values the individual. Our number one value is safety, and providing a safe work environment is a top priority throughout our organization. We also provide growth opportunities that enable people with great values and work ethic an opportunity to be involved in a progressive and highly successful company.

Our welding shop is set up in a production line environment, adhering to industry best practices. Our experienced team has worked with customers all over the world within various industries to build custom suspensions for just about any application. We use quality materials and oversee each step of the fabrication process from welding to painting. Our qualified staff works together to diligently meet the high demands of each customer.

We are always looking to hire people who think critically and want to work in a team environment. Also, we like those who can process new information, draw conclusions, and make recommendations. Improving our processes is one of our strengths, and our employees are the driving force for those improvements. If you are disciplined, accountable, dependable, and share our commitment to customer satisfaction, we would love to welcome you aboard.

Mission Of Link® Manufacturing

Link® develops and manufactures a variety of suspensions specially engineered to address the unique needs of commercial vehicles and equipment. **Our pledge is to provide great products; superior service and support; outstanding product quality; and consistent, on-time delivery to every customer.**

History Of Link® Manufacturing

We are a privately owned by a manufacturer in rural northwest Iowa. Founded in 1980, Link's heritage and culture have combined to make it a unique and highly successful supplier to OEM's in a number of industries. Link possesses expertise in designing systems and modules that meet the space, durability, functionality and weight objectives of customers – then assembles these systems in a flexible and efficient manner. Link is more than just a manufacturing company. We engineer solutions for the future and collaboratively work with OEM customers on products that are a step ahead the industry standard.
